Adequacy and Improvement of Physical Facilities Plan

Purpose

The purpose of the Adequacy and Improvement of Physical Facilities Plan is to analyze the design and arrangement of the buildings and campuses of the institution. This is done in relation to the institution's mission and vision and strategic plan, and to determine if the institution can handle orderly growth and expansion over a period of time. In addition, the plan addresses the adequacy and improvement of all physical facilities and technical infrastructure has been developed and maintained. The technology used by Technical College of the Rockies (TCR) to deliver program content meets the needs of the students without creating barriers to student learning.

Facility and campus improvement is planned and documented as part of the Delta County School District (DCSD) Master Plan. DCSD is responsible for maintenance of the facility while TCR is responsible for custodial and programmatic needs. TCR's Strategic Plan addresses strategic needs for planned growth of the institution's campuses, facility needs in Region 10, maintenance, and technology.

Technical College of the Rockies main campus is located at 1765 HWY 50, Delta, Colorado. On eighty acres, TCR has the original three main buildings (A, B, C) that were constructed in the early 1970s. As programs changed over the years, the buildings have been reconfigured to meet the needs of the current programs located in each building. In the early 1990s, building D was constructed and currently houses TCR's Law Enforcement Academy and Veterinary Assistant classes. In 2022, TCR renovated an existing modular (E) to house Construction trades.

Also located on the property is a shooting range for the Law Enforcement Academy and a situational shoot house located west of the range. The facilities are also used by local law enforcement agencies for training who also help maintain and improve the site.

Responsibility of Implementation

The TCR Executive Director and the administrative team develop the five-year vision for facility and campus improvements required to best serve the students and the communities, and the TCR Executive Director presents the vision to the Board of Directors. Once approved by the Board, TCR Administration works closely with DCSD to incorporate the needs into the DCSD Master Plan.

Evaluation of Physical Resources and Technical Infrastructure

TCR staff, faculty, and administration review the plan annually, examine progress made on the plan, and make necessary revisions to the plan as needed.
