

# PHLEBOTOMY WITH EXTERNSHIP

## About

This course teaches the duties associated with the practice of venipuncture, capillary puncture, and special collection procedures. Students will have experience with quality control, infection control, and safety procedures as well as laboratory computer systems. Students successfully completing this course may take an examination with the ASCP Board of Certification (BOC). ASCP is the gold standard in global certification for medical laboratory professionals.

Prerequisites: High school diploma or GED, or be scheduled to graduate within 12 months; Background check within 1 year; phlebotomy exam simulator ([https://labce.com/phlebotomy\\_exam\\_simulator.aspx](https://labce.com/phlebotomy_exam_simulator.aspx)) and proof of personal healthcare insurance coverage.
